Profile

A hardworking, outgoing and curious autodidact who is interested in the inner workings of Web Design and is presently seeking further field experience. Purveys usable and accessible Web products that communicate their identities in a balance of function and form. Nurtures an organizational and cooperative spirit, pays attention to details, and carries a will to overcome challenges by means of an adaptive learning approach. Aspires to pursue an individual voice in the creative industry, partaking in its innovation through persistent fortification of skills and critical thinking while sharing knowledge and forging collective enterprises with the community.

Skills

Programming

- HTML
- CSS
- Javascript
- Actionscript 3
- PHP
- MySQL
- XML

Cognizant of the “progressive enhancement” tenets and favours the object-oriented approach, valuing code structure and readability. Comfortable with customization of the Wordpress CMS and has a burgeoning handling of Web APIs.

Software

- Flash
- Dreamweaver
- Illustrator
- InDesign
- Photoshop
- Premiere

Languages

Portuguese (first language), Cantonese (fluent speaker) and English (proficient and IELTS qualified).

Communication Aptitudes

Possesses adequate interpersonal and cooperative faculties for realization of collective enterprises. A member of the Café Project (www.cafeproject.org), a non-profit alcohol-free café coordinated by Cambridge students and functioning under the contributions of volunteers.

Interests

Illustration, Skateboarding, Street Art, Bass-playing, Couchsurfing

Education

Sep' 2006 — Jun' 2009

BA (Hons) Web Design [2:1]
University of Lincoln, UK

Sep' 2001 — Jun' 2005

Computer Science
Universidade Nova de Lisboa, Portugal

Selected Projects

Fabula Rasa

www.kurozato.com/pj/fabula-rasa/

An experimental adventure game developed for the final academic year. Its functional components were accomplished through Actionscript, PHP, XML and MySQL while the visual assets resulted from manual drawing that were digitally processed afterwards on Adobe Illustrator and Photoshop.

We Are Connected

www.weareconnected.co.uk

A website created for my university's New Media Degree Show of 2009 in which Web, Interactive and Game design graduates showcased their academic work. My role involved the development of the site's interface via Actionscript and the encapsulation of content in XML format that's dynamically fed to Flash.

HSAD Portfolio

www.kurozato.com/pj/hsad-portfolio/

A portfolio for the exhibition of academic projects. Built with Actionscript and XML.

Kill Your Darklings

www.ghostboy.org

Personal website/blog where I write about art, design and life. Powered by the Wordpress CMS with a customized template.
